Dear User:

Thank you for purchasing this product.

Please read this manual carefully before using our AP300LF Lifting Table.

Do not
stand on

Do not sit on

Scope of Use:

This worktable is designed for lifting workpieces within its specified load capacity.

Application Environment and Relevance:

This product must be used on hard, flat ground.

Precautions and Related Information:

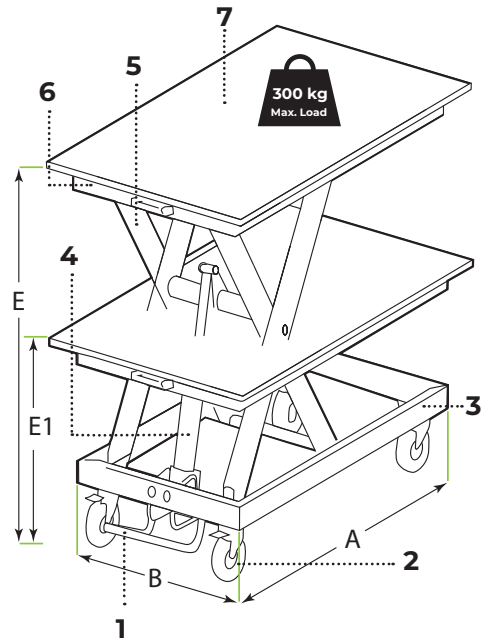

- 1 Before using this product, read the manual carefully to understand its performance and usage. Obtain proper authorization before use.
- 2 Do not overload the worktable. Use it within the rated capacity (300 kg).
- 3 This product is not designed to carry people.
- 4 Keep hands and feet away from the surface coverage area.
- 5 Do not load loose or unstable items.
- 6 Do not load items on the platform or operate the worktable on inclined or uneven surfaces.
- 7 Engage the brakes when loading goods to prevent the worktable from moving.
- 8 Do not load cargo while moving the worktable.
- 9 After lifting, ensure goods do not move sideways on the platform.

Key Components:

- 1 Foot Pedal
- 2 Wheels
- 3 Base
- 4 Oil Cylinder
- 5 Lifting Arm
- 6 Upper Platform
- 7 Surface

Specifications:

Model	AP300LF
Base Dimensions (A x B) (mm)	1100 x 640
Total Height E (Position: Upper)	Approx. 1030 mm
Total Height E1 (Position: Lower)	Approx. 425 mm
Load Capacity (Max.)	300 kg
Net Weight Approx.	52.5 kg
Operating Temperature	10°C to 40°C
Note: The work surface is an optional part.	

Assembly and Usage Instructions:

Assembly:

For convenient transportation and packing, the wheels (2) are not pre-assembled.

Usage:

- 1 Raising the Platform: Repeatedly press the foot pedal (1) up and down.
- 2 Lowering the Platform: Lift the foot pedal (1) upward (ensure it is lifted to the top).
- 3 Important: Always engage the brakes while loading and unloading. ⚠

Care and Maintenance

Proper care and maintenance of this product can extend its service life and improve safety. The following checks must be carried out before each use:

- 1 Inspect the body for any deformation or damage.
- 2 Check for bending or other visible damage.
- 3 Ensure all fasteners on the body are secure and not loose or missing.
- 4 Inspect the wheels and brakes for excessive wear.
- 5 Check the hydraulic system for any leakage.
- 6 If any of the above issues are found, repair or replace the affected parts promptly.
- 7 Check all friction parts before use. If lubricating oil is lacking, please refill it.

Note: This should be checked at least once a year.
